

The Big Bang Theory (Ed Robertson / Steven Jay Page)

C D G D Em
Our whole universe was in a hot dense state,

C D
Then nearly fourteen billion years ago

G D Em
Expansion started. Wait...

C D
The Earth began to cool,

G D Em
The autotrophs began to drool,

C D
Neanderthals developed tools,

G D Em
We built a wall (we built the pyramids),

C D G D Em
Math, science, history, unraveling the mysteries,

C D G
That all started with the big bang!

C D G D Em
"Since the dawn of man" is really not that long,

C D
As every galaxy was formed

G D Em
In less time than it takes to sing this song.

C D
A fraction of a second

G D Em
And the elements were made.

C D
The bipeds stood up straight,

G D Em
The dinosaurs all met their fate,

C D
They tried to leap but they were late

G D Em
And they all died (they froze their asses off)

C D
The oceans and Pangea

G D Em
See ya, wouldn't wanna be ya

C D G
Set in motion by the same big bang!

C D Am7
It all started with the big BANG!

D G Em Am7
It's expanding ever outward but one day

D G Em Am7
It will pause and start to go the other way,

Am7 D Am7
Collapsing ever inward, we won't be here,

D
It won't be heard

Am7 G
Our best and brightest figure that

C D
It'll make an even bigger bang!

C D G D Em (2x)

C D G D Em
Australopithecus would really have been sick of us

C D
Debating how we're here,

G D Em
They're catching deer (we're catching viruses)

C D
Religion or astronomy,

G D Em
Descartes or Deuteronomy

C D G
It all started with the big bang!

C D G D Em
Music and mythology, Einstein and astrology

C D G
It all started with the big bang!

C D G
It all started with the big BANG!
